Education

Punjab University College of Information Technology (PUCIT)
(CGPA 3.76)

Lahore ,Pakistan
December 2022 - Present

Skills

- ❖ Languages : Python, C++ , C# , JavaScript , Dart, SQL , Java, CSS with Frameworks
 - ❖ Technologies : Flutter , FastAPI, Angular , Firebase , [ASP.Net](#) Core MVC , React, MERN , Git/ GitHub ,VS Code, MySQL
-

Experience

- ★ **Software Engineering Intern — Geekinn (Private) Limited** (Aug 2025 – September 2025)
Contributed to full-stack development at Geekinn, working on real project modules, improving UI and backend logic, fixing bugs, and collaborating with senior engineers in an Agile environment.
-

Projects

- ❖ **ScrapUncle – Scrap Pickup Booking App (Flutter & Firebase)**
Developed a cross-platform mobile app for scheduling doorstep scrap pickups. Features include user authentication, scrap category selection, pickup request scheduling, and real-time price updates using **Firebase Realtime Database** and **Cloud Firestore**. Integrated a clean, responsive UI in **Flutter** and implemented **Firebase Authentication**, **Firestore CRUD**, and **Push Notifications**.
 - ❖ **Discord Standup Bot (Python, Discord.py, SQL Server)**
Developed a Discord standup bot using Python and Discord.py with a SQL Server backend to manage standup entries, users, teams, and questions. Implemented **CRUD**, **scheduled reminders**, role-based permissions, and configurable questions. Created SQL queries and stored procedures to aggregate data, generate summaries, and deliver automated reports to discord, improving team productivity with real-time notifications and a centralized standup history.
 - ❖ **Feastly – Online Food Ordering System (ASP.NET Core MVC)**
Built a full-stack restaurant web app with **Razor views**, **SQL Server**, and **MVC** architecture. Implemented restaurant browsing, menu management, ordering, delivery tracking, authentication, admin dashboard, cart features, and order history.
 - ❖ Built Weather Detector App (Flutter + REST APIs)
 - ❖ Made Smart Notes App using Flutter + Dart Integrated Backend
 - ❖ My Tasks Manager (Flutter + Firebase)
 - ❖ Developed Tour Guide App and LMS using REACT & Express.
 - ❖ Made Currency Converter App (Flutter)
 - ❖ Developed Tic Tac Toe Game (JavaScript & Tailwind CSS)
 - ❖ Developed Quiz management system (Java servlets && JSP)
 - ❖ Made Clones of Amazon, BBC Websites using HTML, CSS, JS.
-

Certificates

PUCon'25 (Securing 5th rank in CP Round 1)
Code Fest 4.0 (Certificate of Participation)
Dev Weekends Fellowship Certificate
GeekIn Private Limited Internship Certificate
